DW-V3 MULTI PURPOSE WINCH

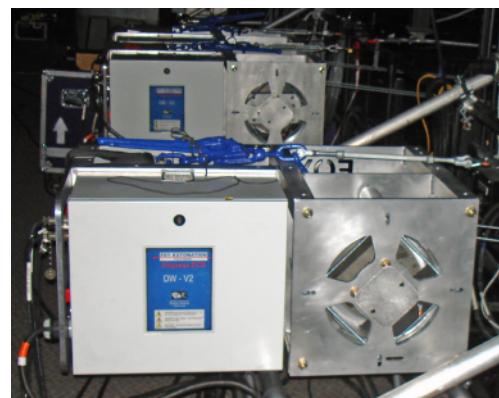

Foy's workhorse, the DW-V3, is a versatile winch capable of fulfilling many roles. With top speeds ranging from 10 fps for a single performer to 5 fps for dual performers it is well suited for variety of acrobatic and aerial ballet routines. Acting as a travel axis, the same package can deliver speeds in excess of 15 fps for fast fluid motion.

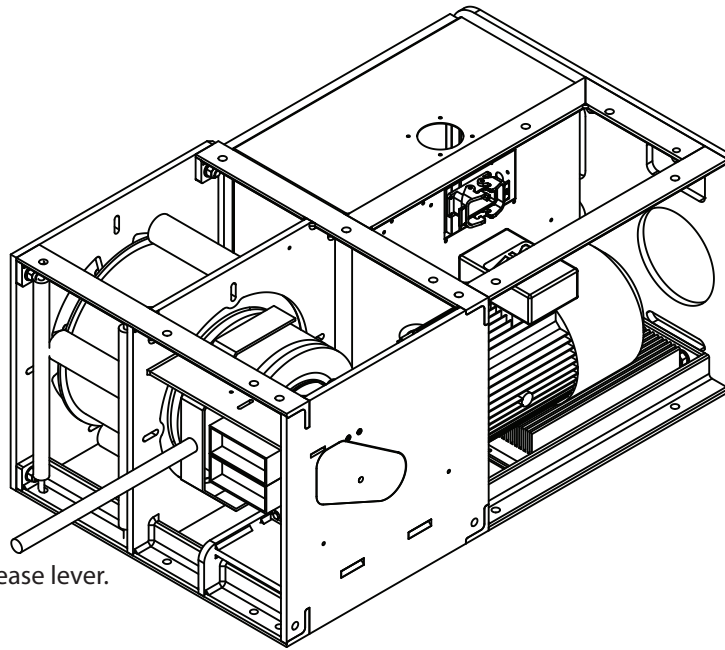

Now in its 3rd generation, the DW-V3 reflects the latest in safety and control technology. The DW-V3 meets all relevant US and European standards making it suitable for every venue.

The winch can be installed as a single axis with a programmable SAC pendant or integrated into a larger Pegasus control network. In either case, reliability and ease of use combine to ensure rapid deployment, quick programming and minimum downtime.

Physical	
Dimensions	39in x 24in x 18in
Weight	600 lbs
Mechanical	
Load	100 200 400 lbs
Max Speed	15 10 5 fps
Max Line Travel	120 ft
Cable Diameter	5/32"
Electrical	
Voltage	200-240 vac 3 phase
Nominal Current	18 amps
Max Current	30 amps

Manual brake release lever.
